<u>State Agency Scorecard Pollution Prevention Ideas</u>

Waste Reduction and Recycling:

Off	ice Paper Waste Reauction:
	Use bulletin boards and electronic mail instead of sending paper copies. Send printed pieces with brief information that refers reader to web site links for more
	detailed information.
	Make double-sided copies when possible.
	Set printer defaults to print double-sided.
	For short memos and announcements, use one-half a page instead of a full page.
	Use lighter weight papers, when possible.
	For paper copies, send copies to divisions or departments to share with respective staffers.
	Cancel unwanted or duplicate subscriptions to periodicals and journals.
	Use revision features in word processing software instead of printing out drafts and making hand-written comments.
	Reuse draft and computer paper for notes and scrap paper.
	Post office announcements in central locations rather than distributing copies
	Reformat faxes to omit cover sheets.
	Preview documents before printing.
	Print only needed pages rather than an entire document.
<u>Pur</u>	chasing:
Ш	Assess inventory levels and sharpen controls to avoid excess inventory levels.
Ш	Track items w/ expiration dates; don't overstock.
Ш	Purchase items of good quality; avoid trash in/trash out.
	Calculate the following when making purchasing decisions: the quality of
	performance and durability of product, with the cost of supplies and
	maintenance and any disposal costs.
	Conduct routine maintenance and cleaning on products and equipment for longer product life.
	Establish exchanges for reusable or surplus items; set up a room or area for this purpose.
	Write into contracts that vendors will take back packing materials, and pallets. Request that they refill containers.
	Purchase in bulk and avoid individual packaging, where feasible.
H	Consider trade-in agreements for equipment and materials to avoid disposal
Ш	issues and related costs.
	Plan ahead and back haul materials whenever possible.
H	Reuse packaging materials.
H	Purchase of recycled-content paper & paper towels
H	Purchase environmentally-friendly cleaners and/or buy cleaners in bulk
ш	dispensers.

Oth	ner Waste Reduction Ideas:
	Plan green meetings and conferences, using electronic means to publicize them,
	eliminating unnecessary handouts, limiting use of non-recyclable food service
	items and providing recycling opportunities for attendees

disposable cups. Encourages employees who bring their lunch to work to carry it in a lunand to use washable containers rather than in plastic wrap or sandwid Buy sugar and creamer in large packages; avoid single serving sized packages.	ch bags.
Recycling:	
☐ Paper recycling: ☐ White	
Mixed	
General	
☐ Confidential	
Newspaper□ Cardboard	
Telephone directories	
Magazines, brochures, publications, etc.	
Bottles/Cans	
☐ Glass ☐ Plastic	
Aluminum	
Tin/Steel cans	
Composting:	
Food waste Yard waste	
Electronic wastes (computers, faxes, monitors*)	
Batteries *(NiCd & lead-acid)	
Printer Cartridges	
Fluorescent lamps & ballasts* Miscellaneous Materials:	
Carpeting	
Construction debris	
Electronics: computers, phones, etc.	
☐ Glass☐ Photographic film	
Triologiaphie iiiri	
Tires	
Wood pallets	
#1 Plastic (PETE) #2 Plastic (HDPE)	
Plastic drums	
Miscellaneous plastic	
Ferrous scrap metal	
Non-ferrous scrap metal	

 $[\]ensuremath{^*}$ Note: These items are required to be recycled or else they must disposed of as "hazardous wastes."

Energy Conservation:
Use of EnergyStar equipment (consider using the EnergyStar benchmarking tool for commercial real estate www.energystar.gov) Encourage employee use of public transit/ridesharing Encourage telecommuting, carpooling to meetings and conference calls Purchase and use of fuel efficient agency vehicles, including flex-fuel and hybride Install light sensors in rooms Use of compact fluorescent bulbs Preferred parking for electric or natural gas vehicles and bicycles Efficient lighting: Sensors Efficient fluorescent ballasts (T-8's or T-5's) Use of long-lasting, efficient LED exit signs Encourage people to save energy by using stairs rather than elevators and manual rather than automatic doors.
Support Mass transit, Carpooling & Telecommuting:
 Encourage employee use of public transit/ridesharing Encourage telecommuting, carpooling to meetings and conference calls Purchase and use of fuel efficient agency vehicles, including flex-fuel and hybrids Preferred parking for electric or natural gas vehicles and bicycles
Water Conservation:
Low flow restrictors (high pressure) on faucets & shower heads Sensors on faucets, toilets Low flow toilets Preventative maintenance of drips and leaks
Green Building:
Landscaping: Capture/use of stormwater for irrigation (ex. rain barrels and/or cisterns) Use of rain meters to minimize needed watering Minimizing impervious surfaces Use of rain gardens to capture stormwater and encourage infiltration (www.dof.virginia.gov/rfb/rain-gardens.shtml) Replacing lawns with mulched beds and drought-resistant species Organic fertilizers & efficiently timed applications Buffer strips around all water bodies Use of native vegetation Consider use of "BayScapes" (www.fws.gov/chesapeakebay/Bayscapes.htm) Integrated Pest Management (plan to use only what is needed or use natural predators and organic applications)
Green Building Maintenance: Preventative maintenance of all vehicles and equipment

[Use of indoor plants to assist in indoor air filtering
Ī		Last-in/first-out inventory systems to reduce unnecessary wastage
Ī		Effective systems of storage, labeling, handling of hazardous materials
Ī		Recycling vehicle fluids*
Ī		Using aqueous parts cleaners versus hazardous solvents
Ì		Covering, distilling, and reusing solvents
į		Use of latex paints*
į		Minimizing use of HVAC/cooling tower chemicals through magnetic or ionic-flux mechanisms
		Reusing cooling tower waters as much as possible and minimizing de-scale and antibacterial chemicals
ſ		Reuse/donation of unused materials
Ī		Policy to use "dry" clean-up methods (versus using spray water)
		Plug drains in maintenance shops so that spills are not discharged to sewer/ storm sewer
ſ		Efficient HVAC
Ī		Add Insulation
Ī		Storm windows
Ī		Tinted windows
Ī		Low flow restrictors (high pressure) on faucets & shower heads
Ī		Sensors on faucets, toilets
ĺ		Low flow toilets
		Preventative maintenance of drips and leaks
